SOCIAL DIMENSIONS OF CANADIAN SPORT AND PHYSICAL ACTIVITY by Jane Crossman and Jay Scherer is an up-to-date, comprehensive overview of the relationship between sociological issues and sport, with a specific focus on the Canadian sports industry.

Today, more and more Canadians follow not only the major leagues of North American sport, but teams and leagues from around the world, including the most popular European soccer leagues. For generations, meanwhile, immigrants have been bringing their sports and their ways of doing physical activity to Canada. As such, we are not simply a carbon copy of another country or an amalgamation of countries.

We are uniquely Canadian and, over time, we have shaped our own cultural ideologies and our own ways of interpreting and playing sport, sometimes in competing and contradictory ways.
