Kin:

In memory of my mother, who did not have the benefit of schooling, but gave me the freedom to question, unconditional support of my pursuits, and the humility to know that there is always more to learn.

George:

My passion for teaching has been richly rewarded by many opportunities including the privilege of co-authoring this text. I dedicate this book to my wife, Gail, and my family, friends, colleagues, and students who have encouraged me along the way.
Kin Lo, PhD, FCA is the Senior Associate Dean—Students at the Sauder School of Business, University of British Columbia. He holds the CA Professorship in Accounting established by the Institute of Chartered Accountants of British Columbia (ICABC). After receiving a Bachelor of Commerce from the University of Calgary, he articled at PricewaterhouseCoopers and subsequently earned his doctorate from the Kellogg School of Management at Northwestern University in Chicago in 1999. His research has been published in the most important accounting journals, including *Journal of Accounting Research* and *Journal of Accounting and Economics*, and he has served as an Associate Editor at the latter journal from 2003 to 2011.

Since joining UBC in 1999, Professor Lo has taught extensively in intermediate-level financial accounting for undergraduates, as well as master and doctoral-level courses. He has coached numerous winning teams in regional, national, and global case competitions. His outstanding teaching has been recognized by the Killam Teaching Prize. Kin has also been a visiting professor at MIT Sloan School of Management and the University of California at Irvine’s Merage School of Business.

Aside from research and teaching, Kin is also active in the professional accounting community, serving on provincial and national committees and contributing as a columnist to the ICABC’s magazine *Beyond Numbers*. From 2008 to 2011, Professor Lo was a member of the Board of Evaluators for the Chartered Accountants’ national Uniform Final Evaluation (UFE). He is a member of the Academic Advisory Council for the Accounting Standards Board of Canada. In recognition of his contributions to accounting education, he was awarded Fellowship by the ICABC in 2013. Kin is also an avid sailor.

George Fisher, MBA, CPA, CGA is the Chair of Accounting at Douglas College where he teaches financial accounting in the College’s Bachelor of Business Administration and Post-Degree Diploma programs.

For the past three years, Mr. Fisher has been actively involved in the development of curriculum for the Chartered Professional Accountants. His publications for CPA Canada include *Module 5.1, Intermediate Financial Reporting 1, Module 5.2, Intermediate Financial Reporting 2*, and *Module 5.3, Advanced Financial Reporting*. Mr. Fisher also co-led the development of the finance elective for the CPA Professional Education Program.

Mr. Fisher was previously associated with the Certified General Accountants for more than 15 years in several roles. His publications for CGA Canada include *Model Financial Statements*, and the domestic and international versions of *Corporate Finance Fundamentals (FN1)*, *Financial Accounting: Assets (FA2)*, and *Financial Accounting: Consolidations and Advanced Issues (FA4)*.

Preface

CHAPTER 11 Current Liabilities and Contingencies
A. Introduction
B. Definition, Classification, and Measurement of Liabilities
   1. Liabilities defined
   2. Recognition
   3. Financial and non-financial liabilities
   4. Current versus non-current liabilities
   5. Measurement
C. Current Liabilities
   1. Trade payables
   2. Common non-trade payables
   3. Notes payable
   4. Credit (loan) facilities
   5. Warranties
   6. Deferred revenues
   7. Customer incentives
   8. Other current liabilities
D. Contingencies
   1. Contingencies involving potential outflows
   2. Contingencies involving potential inflows
   3. Treatment of contingencies under ASPE
E. Commitments and Guarantees
   1. Commitments
   2. Guarantees
F. Presentation and Disclosure
G. Substantive Differences Between Relevant IFRS and ASPE
H. Standards in Transition
I. Summary
J. Answers to Checkpoint Questions
K. Glossary
L. For Further Reading
M. References
N. Problems
O. Mini-Cases

CHAPTER 12 Non-current Financial Liabilities
A. Introduction
   1. Overview
   2. Financial leverage
   3. Debt-rating agencies
B. Common Non-Current Financial Liabilities
   1. Notes payable
   2. Bonds
C. Initial Measurement
   1. Debt exchanged for non-cash assets
   2. Debt issued at non-market rates of interest
   3. Compound financial instruments
   4. Issuing bonds at par, a premium, or a discount

CHAPTER 18 Accounting for Leases

A. Introduction

B. Economics of Leasing

C. Classifying and Accounting for Operating and Finance Leases
   1. Lease classification
   2. Supporting indicators for lease classification
   3. Accounting for finance and operating leases
   4. Preference for finance or operating lease treatment
   5. Rationale for supporting indicators relating to lease term and present value
   6. Basic numerical example

D. Complicating Factors in Leases
   1. Residual values—guaranteed and unguaranteed
   2. Inclusion of bargain purchase options in minimum lease payments
   3. Interest rate used in present value calculations
   4. Cash flows to be included in present value calculations
   5. Third-party guarantees: an example of rules avoidance

E. Presentation and Disclosure
   1. Current/non-current classification of lease liability or lease receivables
   2. Disclosures
F. Sale—Leasebacks
  869
G. Substantive Differences Between Relevant IFRS and ASPE
  1. Quantitative guidelines for lease classification
  872
  2. Additional considerations for lease classification on
     lessor’s books under ASPE
  872
  3. Sub-classification of finance leases
  872
  4. Lessee’s discount rate for present value calculations

Preface

“There is too much material to learn!” is a complaint commonly heard among both students and instructors of intermediate-level financial accounting. The current environment in Canada involving multiple accounting standards certainly adds to the problem. However, this sentiment was prevalent even before the splintering of Canadian generally accepted accounting principles (GAAP) in 2011. So what is the source of the problem, and how do we best resolve it?

Regardless of one’s perspective—as an instructor of intermediate accounting, as a student, or as a researcher reading and writing papers—often the problem of too much content is an illusion. Instead, the issue is really one of flow, not just of words, but of ideas. Why does a class, research paper, or presentation appear to cover too much, and why is it difficult to understand? Most often, it is because the ideas being presented did not flow—they were not coherent internally within the class, paper, or presentation, or not well connected with the recipients’ prior knowledge and experiences.

Connecting new ideas to a person’s existing knowledge and efficiently structuring those new ideas are not just reasonable notions. Modern neuroscience tells us that for ideas to be retained they need to be logically structured to each other and presented in ways that connect with a person’s prior knowledge and experiences.

OUR APPROACH

How can we better establish the flow of ideas in intermediate accounting? One way is to apply more accounting theory to help explain the “why” behind accounting standards and practices. Inherently, humans are inquisitive beings who want to know not just how things work, but also why things work a particular way. When students understand “why,” they are better able to find connections between different ideas and internalize those ideas with the rest of their accumulated knowledge and experiences.

This approach contrasts with that found in other intermediate accounting textbooks, which present accounting topics in a fragmented way, not only between chapters but within chapters. For example, how is the conceptual framework for financial reporting connected with other ideas outside of accounting? How do the components such as qualitative characteristics relate to the elements of financial statements? Fragmented ideas are difficult to integrate into the brain, which forces students to rely on memorization tricks that work only for the short term. For example, a frequently used memory aid for the conceptual framework is a pyramid; this is a poor pedagogical tool because the concepts within the diagram are not logically connected and the pyramid shape itself has no basis in theory. In contrast, we anchor the conceptual framework on the fundamental notions of economic demand and supply.

Also different from other textbooks, we do not aim to be encyclopedic—who wants to read an encyclopedia? This textbook is designed as a learning tool for students at the intermediate level, rather than as a comprehensive reference source they might use many years in the future. Being comprehensive burdens students with details that are not meaningful to them. At the rate at which standards are changing, books become outdated rapidly, and students should learn to refer to official sources of accounting standards such as the CPA Canada Handbook.
ARE INTERMEDIATE ACCOUNTING STUDENTS READY FOR ACCOUNTING THEORY?

Most programs that offer an accounting theory course do so in their final year, with good reason—concepts in accounting theory are difficult. Thorough exploration of these concepts requires a solid grounding in accounting standards and practices and higher-level thinking skills. However, not exposing students to these concepts earlier is a mistake.

Other management (and non-management) disciplines are able to integrate theory with technical applications. For example, when finance students study investments and diversification, the capital asset pricing model is an integral component. Finance students also learn about firms’ capital structure choices in the context of Modigliani and Miller’s propositions, the pecking order theory, and so on. Students in operations management learn linear programming as an application of optimization theory. Relegating theory to the end of a program is an exception rather than the rule.

Accounting theory is too important to remain untouched until the end of an accounting program. This text exposes students to the fundamentals of accounting theory in the first chapter, which lays the foundation for a number of threshold concepts (see Meyer and Land, 2003).

THRESHOLD CONCEPTS

While by no means perfect, this textbook aims to better establish the flow of ideas throughout the book by covering several threshold concepts in the first three chapters. Threshold concepts, in this case, are the portals that connect accounting standards and practices with students’ prior knowledge and experiences. As Meyer and Land suggest, these threshold concepts will help to transform how students think about accounting, help students to integrate ideas within and between chapters, and irreversibly improve their understanding of accounting. Introducing these concepts is not without cost, because threshold concepts will often be troublesome due to their difficulty and the potential conflict between students’ existing knowledge and these new concepts.

The inside front cover identifies the threshold concepts and the layout of the chapters in both volumes of this text. Crucially, the first chapter in Volume 1 begins with the threshold concepts of uncertainty and information asymmetry. The need to make decisions under uncertainty and the presence of information asymmetries results in economic consequences of accounting choice. Those consequences differ depending on whether the accounting information interacts with efficient securities markets. These concepts open up the notion of supply and demand for accounting information, which forms the basis of the conceptual frameworks for financial reporting (Chapter 2). Decision making under uncertainty leads to the issues surrounding the timing of recognition under accrual accounting (Chapter 3), which in turn lead to the concept of articulation between financial statements. Accounting choices having economic consequences leads to considerations of the quality of earnings and the potential for earnings management (Chapter 3).

These concepts then resurface at different points in the remaining 17 chapters. For example, the concept of information asymmetry is fundamental to understanding the reasons that companies issue complex financial instruments (Chapter 14). Another example is the important role of the moral hazard form of information asymmetry

---

in explaining why accounting standards do not permit the recognition of gains and losses from equity transactions through net income. A third example is the influence of uncertainty and executives’ risk aversion on the accounting standards for pension plans, which allow the gains and losses to flow through other comprehensive income rather than net income. A fourth example is the application of information asymmetry to the accounting for leases (Chapter 18).

As an aid for students, we have put threshold concepts icons in the margin to identify when these concepts appear in the various chapters. To further clarify these icons, in the third edition we have added the name of the specific concept next to the icon to ensure students understand which concepts are being referenced.

ACCOUNTING STANDARDS AND PRACTICES

Along with the unique approach of introducing and integrating theory through the use of threshold concepts, this text also provides thorough coverage of accounting standards and practices typically expected of an intermediate accounting course. This edition reflects recently issued standards, including IFRS 15 on revenue recognition and IFRS 9 on financial instruments.

Following an overview of the four financial statements in Chapter 3 in Volume 1, Chapter 4 explores revenue and expense recognition to highlight the connection financial reporting has to enterprises’ value-creation activities. Chapters 5 to 10 in this book then examine, in detail, issues involving the asset side of the balance sheet.

The second volume begins with coverage of the right-hand side of the balance sheet in Chapters 11 to 13. Coverage in Chapters 14 to 18 then turns to special topics that cut across different parts of the balance sheet and income statement: complex financial instruments, earnings per share, pension costs, income taxes, and leases. Chapter 19 examines the statement of cash flows, which integrates the various topics covered in Chapters 4 through 18. Chapter 20 revisits the topic of accounting changes introduced in Chapter 3.

INTEGRATION OF IFRS

This is the first Canadian text written with International Financial Reporting Standards (IFRS) in mind throughout the development process, rather than as an afterthought. For example, we devote a separate chapter (Chapter 10) to explore issues surrounding asset revaluation and impairment because these issues cut across different asset categories under IFRS. The complete integration of standards in the development process adds to the smooth flow of ideas in and between chapters. Another example is Chapter 10’s coverage of agriculture activities, a topic covered by IFRS but not by past Canadian standards.

COVERAGE OF ASPE

While this text puts emphasis on IFRS, we do not neglect Accounting Standards for Private Enterprises (ASPE). Near the end of each chapter is a table that identifies differences between IFRS and ASPE. In contrast to other textbooks, we identify only substantive differences rather than every detail. In addition to the summary table, we carefully choose to discuss certain important differences in the main body of the chapters to create opportunities for understanding the subjective nature of accounting standards and the advantages and disadvantages of different standards. For example, Chapter 8 discusses the different treatments of interest capitalization under IFRS and ASPE. In the end-of-chapter Problems, we have placed icons in the margin to identify questions that apply ASPE instead of IFRS.
REFERENCE TO ACCOUNTING STANDARDS

Consistent with the threshold concepts described above, this textbook avoids treating accounting standards as written in stone and with only one interpretation. Ultimately, it is people who make accounting standards and it is important to analyze and evaluate the choices that standard setters make to understand the rationale behind the standards. Where appropriate, the chapters provide specific quotations from authoritative standards so that students begin to develop their ability to interpret the standards themselves rather than rely on the interpretations of a third party.

INTEGRATION OF LEARNING OBJECTIVES

To enhance the flow of material, each chapter fully integrates learning objectives from beginning to end. Each chapter enumerates four to six learning objectives that the chapter covers. The end of each chapter summarizes the main points relating to each of these learning objectives. We have also organized the problems at the end of each chapter to match the order of these learning objectives as much as possible.

INTEGRATION OF CPA COMPETENCIES

To ensure students are building the knowledge and skills required for the CPA designation, the third edition has increased its focus on covering the competencies outlined in the CPA Competency Map and Knowledge Supplement. Each chapter now opens with a list of CPA Competencies, related Knowledge Items, and levels that are covered in that chapter; also, a master list of all the financial reporting Competencies and Knowledge Items is available on the back inside cover. As well, all the problems on MyAccountingLab for Intermediate Accounting 3e are mapped to the Competency, Knowledge Item, and level that is being assessed. These features will allow students and faculty interested in the CPA designation to become familiar with the Competency Map and the material covered in the book.

CHAPTER FEATURES

This text contains a number of features that augment the core text. We are mindful that too many “bells and whistles” only serve to distract students, so we have been selective and have included only features that reinforce student learning. The result is an uncluttered page layout in comparison to competing textbooks. We firmly believe that clean design supports clear thinking.

Opening Vignettes

Each chapter opens with a short vignette of a real-world example that students will easily recognize and to which they will relate. These examples range from household names such as Bank of Montreal, Bombardier, and Telus, to car shopping and Christopher Columbus. As mentioned earlier, this connection to existing knowledge and experiences is crucial to learning new concepts. Each vignette serves to motivate interesting accounting questions that are later addressed in the chapter.

Charts and Diagrams

We have chosen to use graphics sparingly but deliberately. These graphics always serve to augment ideas in a logical way rather than to serve as memory “gimmicks” that lack meaning. For instance, it has been popular to use a triangle to organize the Conceptual Framework for financial reporting. We eschew the use of this triangle because that
shape has no logical foundation or connection with the Conceptual Framework. Instead, we develop the Conceptual Framework from fundamental forces of supply and demand, so we provide a diagram that illustrates the interaction of those forces:

**Feature Boxes**

When warranted, we provide more in-depth discussions to reinforce the core message in the main body of the chapters. These discussions often take the form of alternative viewpoints or surprising research results that serve to broaden students’ perspectives on the issues. Compass icons identify these feature boxes to denote the different perspectives on various issues.

---

**STILL WAITING...**

In 1670, an incorporation under the British royal charter created “The Governor and Company of Adventurers of England trading into Hudson’s Bay.” The charter gave the company exclusive rights to the fur trade in the watershed flowing into Hudson Bay. The company continues to operate today as The Hudson’s Bay Company. It was publicly traded until January 2006, when it was purchased by private equity firm NRDC Equity Partners. If investors had to wait until dissolution to find out what happened to their investments, they would have been waiting for almost three and a half centuries—and counting!

---

**Checkpoint Questions**

At important transitional points in each chapter, we pose “Checkpoint Questions” to engage students to reflect upon what they have just read, and to review, if necessary, before proceeding to the next portion of the chapter. These questions appear at the end of sections and there are five to ten such questions within each chapter. To encourage students to think about these questions before looking at the answers, we have placed the answers toward the end of each chapter, immediately after the chapter summary.

---

**End-of-Chapter Problems**

The end of each chapter contains many questions for students to hone their skills. Each chapter in the third edition features new questions, covering new chapter material and IFRS standards. We choose to use a single label—Problems—for all questions. This choice follows from our focus on learning objectives. We have organized the Problems...
in the order of the learning objectives, and within each learning objective according
to the Problem's level of difficulty (easy, medium, or difficult). This approach allows
students to work on each learning objective progressively, starting with easier ques-
tions and then mastering more difficult questions on the same learning objective. This
approach is much preferable to having students jump around from “exercises” to
“discussion questions” to “assignments,” and so on. Problems in the textbook that are
coloured red are also available on MyAccountingLab. Students have endless oppor-
tunities to practise many of these questions with new data and values every time they
use MyAccountingLab.

Cases
We have included Mini-Cases that are based on, or mimic, real business scenarios. The
distinguishing feature of these cases is their focus on decision making. While they are
technically no more challenging than Problems, cases bring in additional real-world
subjective considerations that require students to apply professional judgment.

We have also included an appendix that provides case solving tips to students, as
well as three comprehensive cases that cover topics across multiple chapters and two
capstone cases that cover many of the topics in both volumes of the textbook. These
cases simulate those on professional exams that require four to five hours of an entry-
level professional accountant.

TECHNOLOGY RESOURCES

MyAccountingLab

MyAccountingLab delivers proven results in helping individual students succeed. It
provides engaging experiences that personalize, stimulate, and measure learning for
each student. MyAccountingLab is the portal to an array of learning tools for all learning
styles—algorithmic practice questions with guided solutions are only the begin-
nning. MyAccountingLab provides a rich suite of learning tools, including:

- Static and algorithmic problems from the textbook
- DemoDocs Examples—question-specific interactive coaching
- A personalized study plan
- An online, interactive Accounting Cycle Tutorial, reinforcing students’ under-
  standing of accounting foundations
- A dynamic eText with links to media assets
- A Case Solving Primer
- Sample Tests
- Questions to accompany the new Financial Statements
- Learning Catalytics—A “bring your own device” student engagement, assess-
  ment, and classroom intelligence system that allows instructors to engage students
  in class with a variety of question types designed to gauge student understanding

Pearson eText

Pearson eText gives students access to the text whenever and wherever they have
access to the Internet. eText pages look exactly like the printed text, offering powerful
new functionality for students and instructors. Users can create notes, highlight text in different colours, create bookmarks, zoom, click hyperlinked words and phrases to view definitions, and view in single-page or two-page view. Pearson eText allows for quick navigation to key parts of the eText using a table of contents and provides full-text search. The eText may also offer links to associated media files, enabling users to access videos, animations, or other activities as they read the text.

CourseSmart for Instructors

CourseSmart goes beyond traditional expectations—providing instant, online access to the textbooks and course materials you need at a lower cost for students. And even as students save money, you can save time and hassle with a digital eTextbook that allows you to search for the most relevant content at the very moment you need it. Whether it’s evaluating textbooks or creating lecture notes to help students with difficult concepts, CourseSmart can make life a little easier. See how when you visit www.coursesmart.com/instructors.

CourseSmart for Students

CourseSmart goes beyond traditional expectations—providing instant, online access to the textbooks and course materials you need at significant savings over the price of the printed text. With instant access from any computer and the ability to search your text, you’ll find the content you need quickly, no matter where you are. And with online tools like highlighting and note-taking, you can save time and study efficiently. See all the benefits at www.coursesmart.com/students.

Learning Solutions Managers

Pearson’s Learning Solutions Managers work with faculty and campus course designers to ensure that Pearson technology products, assessment tools, and online course materials are tailored to meet your specific needs. This highly qualified team is dedicated to helping schools take full advantage of a wide range of educational resources, by assisting in the integration of a variety of instructional materials and media formats. Your local Pearson sales representative can provide you with more details on this service program.

Pearson Custom Library

For enrollments of at least 25 students, you can create your own textbook by choosing the chapters that best suit your own course needs. To begin building your custom text, visit www.pearsoncustomlibrary.com. You may also work with a dedicated Pearson Custom editor to create your ideal text—publishing your own original content or mixing and matching Pearson content. Contact your local Pearson sales representative to get started.

Supplements

The following instructor supplements are available for downloading from a password-protected section of Pearson Canada’s online catalogue (http://catalogue.pearsoned.ca). Navigate to your book’s catalogue page to view a list of those supplements that are available. See your local sales representative for details and access.

- **Instructor’s Solutions Manual.** Created by Kin Lo and George Fisher, this resource provides complete, detailed, worked-out solutions for all the Problems in the textbook.
Instructor’s Resource Manual. The Instructor’s Resource Manual features additional resources and recommendations to help you get the most out of this textbook for your course.

Computerized Test Bank. Pearson’s computerized test banks allow instructors to filter and select questions to create quizzes, tests, or homework. Instructors can revise questions or add their own, and may be able to choose print or online options. These questions are also available in Microsoft Word® format.

PowerPoint® Presentations. Approximately 30–40 PowerPoint® slides, organized by learning objective, accompany each chapter of the textbook.

Image Library. The Image Library provides access to many of the images, figures, and tables in the textbook.

ACKNOWLEDGMENTS

During the development of this book, we obtained many helpful and invaluable suggestions and comments from colleagues across the country. We sincerely thank the following instructors who took the time and effort to provide thoughtful and meaningful reviews during the development of this third edition:

Stephen Bergstrom, SAIT Polytechnic
Carla Carnaghan, University of Lethbridge
Sandra Daga, University of Toronto Scarborough
Kathy Falk, University of Toronto Mississauga
Wenxia Ge, University of Manitoba
Trevor Hagyard, Concordia University
Justin Jin, McMaster University
Liona Lai, York University
Dal Pirot, Grant MacEwan University
Brad Sacho, Kwantlen Polytechnic University
Zvi Singer, McGill University
Rikard Smistad, Mount Royal University

Thanks also go to Desmond Tsang and Zvi Singer, both of McGill University, for their hard work in creating many of the end-of-chapter Mini-Cases, and to Kim Trottier of Simon Fraser University and Trevor Hagyard of Concordia University for their creative and challenging Comprehensive Cases.

We would also like to acknowledge the assistance of the many members of the team at Pearson Canada who were involved throughout the writing and production process: Megan Farrell, Acquisitions Editor; Patricia Ciardullo, Program Manager; Johanna Schlaepfer, Developmental Editor; Sarah Gallagher, Project Manager; Yashmita Hota, Production Editors; Marg Bukta, Copy Editor; Media Content Editor; and Loula March Marketing Manager.
