Case stories relating to the everyday experiences of children in early childcare environments.

EARLY LEARNERS IN PRESCHOOLS AND KINDERGARTENS:
50 Case Stories in Child Development, Inclusion, Collaboration and Special Needs is a compilation of fictional case stories representing typical day to day narratives of early learners aged 3-6. Many stories represent typical students in day-to-day learning situations and challenges, and others include elements of students who may experience a long-term or transitory challenge, including those with a diagnosis or an identification of an exceptionality. All stories focus on teaching and learning from a positive perspective of care and support for the development of early learners.

Utilizing perspectives from across Canada, the text also seeks to reflect recent updates and changes to the field of early learning in Canada and to provide students with a comprehensive framework for child development and inclusion in early learners.
