Preface xiii
Acknowledgments xvii

1 Introduction 1
1.1 The Objective of This Book 1
1.2 Some Historical Perspective 1
1.3 The 2007–2008 Market Meltdowns 10
1.4 Efficient Contracting 16
1.5 A Note on Ethical Behaviour 18
1.6 Rules-Based versus Principles-Based Accounting Standards 20
1.7 The Complexity of Information in Financial Accounting and Reporting 21
1.8 The Role of Accounting Research 21
1.9 The Importance of Information Asymmetry 22
1.10 The Fundamental Problem of Financial Accounting Theory 24
1.11 Regulation as a Reaction to the Fundamental Problem 26
1.12 The Organization of This Book 27
1.12.1 Ideal Conditions 27
1.12.2 Adverse Selection 27
1.12.3 Moral Hazard 28
1.12.4 Standard Setting 28
1.12.5 The Process of Standard Setting 29
1.13 Relevance of Financial Accounting Theory to Accounting Practice 32

2 Accounting Under Ideal Conditions 37
2.1 Overview 37
2.2 The Present Value Model Under Certainty 38
2.2.1 Summary 41
2.3 The Present Value Model Under Uncertainty 41
2.3.1 Summary 47
2.4 Examples of Present Value Accounting 48
2.4.1 Embedded Value 48
2.4.2 Reserve Recognition Accounting 48
2.4.3 Critique of RRA 52
2.4.4 Summary of RRA 56
2.5 Historical Cost Accounting Revisited 56
2.5.1 Comparison of Different Measurement Bases 56
2.5.2 Conclusion 58
2.6 The Non-Existence of True Net Income 58
2.7 Conclusion to Accounting Under Ideal Conditions 59

3 The Decision Usefulness Approach to Financial Reporting 72
3.1 Overview 72
3.2 The Decision Usefulness Approach 73
3.2.1 Summary 74
3.3 Single-Person Decision Theory 74
   3.3.1 Decision Theory Applied 74
   3.3.2 The Information System 78
   3.3.3 Information Defined 82
   3.3.4 Summary 83
3.4 The Rational, Risk-Averse Investor 83
3.5 The Principle of Portfolio Diversification 85
3.6 Increasing the Decision Usefulness of Financial Reporting 87
   3.6.1 Introduction 87
   3.6.2 Objectives of Management Discussion and Analysis 88
   3.6.3 An Example of MD&A Disclosure 89
   3.6.4 Is MD&A Decision Useful? 99
   3.6.5 Conclusion 101
3.7 The Reaction of Professional Accounting Bodies to the Decision Usefulness Approach 102
   3.7.1 The Conceptual Framework 102
   3.7.2 Summary 107
3.8 Conclusions on Decision Usefulness 107

4 Efficient Securities Markets 120
4.1 Overview 120
4.2 Efficient Securities Markets 121
   4.2.1 The Meaning of Efficiency 121
   4.2.2 How Do Market Prices Fully Reflect All Available Information? 124
   4.2.3 Summary 126

4.3 Implications of Efficient Securities Markets for Financial Reporting 127
   4.3.1 Implications 127
   4.3.2 Summary 128
4.4 The Informativeness of Price 129
   4.4.1 A Logical Inconsistency 129
   4.4.2 Summary 132
4.5 A Model of Cost of Capital 132
   4.5.1 A Capital Asset Pricing Model 132
   4.5.2 Critique of the Capital Asset Pricing Model 135
   4.5.3 Summary 137
4.6 Information Asymmetry 137
   4.6.1 A Closer Look at Information Asymmetry 137
   4.6.2 Fundamental Value 140
   4.6.3 Summary 142
4.7 The Social Significance of Securities Markets that Work Well 143
4.8 Conclusions on Efficient Securities Markets 145

5 The Value Relevance of Accounting Information 153
5.1 Overview 153
5.2 Outline of the Research Problem 154
   5.2.1 Reasons for Market Response 154
   5.2.2 Finding the Market Response 156
   5.2.3 Separating Market-Wide and Firm-Specific Factors 156
   5.2.4 Comparing Returns and Income 157
5.3 The Ball and Brown Study 159
5.3.1 Methodology and Findings 159
5.3.2 Causation Versus Association 160
5.3.3 Outcomes of the BB Study 162
5.4 Earnings Response Coefficients 163
5.4.1 Reasons for Differential Market Response 163
5.4.2 Implications of ERC Research 169
5.4.3 Measuring Investors' Earnings Expectations 170
5.4.4 Summary 172
5.5 A Caveat about the “Best” Accounting Policy 173
5.6 The Value Relevance of Other Financial Statement Information 174
5.7 Conclusions on Value Relevance 176

6 The Measurement Approach to Decision Usefulness 189
6.1 Overview 189
6.2 Are Securities Markets Fully Efficient? 191
6.2.1 Introduction 191
6.2.2 Prospect Theory 194
6.2.3 Is Beta Dead? 197
6.2.4 Excess Stock Market Volatility 199
6.2.5 Stock Market Bubbles 200
6.2.6 Discussion of Securities Market Efficiency Versus Behavioural Finance 200
6.3 Efficient Securities Market Anomalies 202
6.4 Limits to Arbitrage 206
6.5 A Defence of Average Investor Rationality 209
6.5.1 Dropping Rational Expectations 209
6.5.2 Dropping Common Knowledge 211
6.6 Summary re Securities Market Inefficiencies 215
6.7 Conclusions About Securities Market Efficiency and Investor Rationality 216
6.8 Other Reasons Supporting a Measurement Approach 219
6.9 The Value Relevance of Financial Statement Information 219
6.10 Ohlson's Clean Surplus Theory 221
6.10.1 Three Formulae for Firm Value 221
6.10.2 Earnings Persistence 225
6.10.3 Estimating Firm Value 227
6.10.4 Empirical Studies of the Clean Surplus Model 230
6.10.5 Summary 233
6.11 Auditors' Legal Liability 233
6.12 Asymmetry of Investor Losses 236
6.13 Conclusions on the Measurement Approach to Decision Usefulness 241

7 Measurement Applications 252
7.1 Overview 252
7.2 Current Value Accounting 253
7.2.1 Two Versions of Current Value Accounting 253
7.2.2 Current Value Accounting and the Income Statement 255
7.2.3 Summary 256
7.3 Longstanding Measurement Examples 256
  7.3.1 Accounts Receivable and Payable 256
  7.3.2 Cash Flows Fixed by Contract 256
  7.3.3 The Lower-of-Cost-or-Market Rule 257
  7.3.4 Revaluation Option for Property, Plant, and Equipment 258
  7.3.5 Impairment Test for Property, Plant, and Equipment 258
  7.3.6 Summary 259

7.4 Financial Instruments Defined 259

7.5 Primary Financial Instruments 259
  7.5.1 Standard Setters Back Down Somewhat on Fair Value Accounting 259
  7.5.2 Longer-Run Changes to Fair Value Accounting 261
  7.5.3 The Fair Value Option 262
  7.5.4 Loan Loss Provisioning 264
  7.5.5 Summary and Conclusions 266

7.6 Fair Value Versus Historical Cost 267

7.7 Liquidity Risk and Financial Reporting Quality 270

7.8 Derecognition and Consolidation 271

7.9 Derivative Financial Instruments 275
  7.9.1 Characteristics of Derivatives 275
  7.9.2 Hedge Accounting 278

7.10 Conclusions on Accounting for Financial Instruments 281

7.11 Accounting for Intangibles 282
  7.11.1 Introduction 282
  7.11.2 Accounting for Purchased Goodwill 283
  7.11.3 Self-Developed Goodwill 287
  7.11.4 The Clean Surplus Model Revisited 289
  7.11.5 Summary 289

7.12 Reporting on Risk 290
  7.12.1 Beta Risk 290
  7.12.2 Why Do Firms Manage Firm-Specific Risk? 291
  7.12.3 Stock Market Reaction to Other Risks 292
  7.12.4 A Measurement Approach to Risk Reporting 294
  7.12.5 Summary 297

7.13 Conclusions on Measurement Applications 297

8 The Efficient Contracting Approach to Decision Usefulness 311

8.1 Overview 311

8.2 What Is Efficient Contracting Theory? 313

8.3 Sources of Efficient Contracting Demand for Financial Accounting Information 314
  8.3.1 Lenders 314
  8.3.2 Shareholders 314

8.4 Accounting Policies for Efficient Contracting 315
  8.4.1 Reliability 315
  8.4.2 Conservatism 316

8.5 Contract Rigidity 318

8.6 Employee Stock Options 322

8.7 Discussion and Summary of ESO Expensing 329
8.8  Distinguishing Efficiency and Opportunism in Contracting 330
8.9  Summary of Efficient Contracting for Debt and Stewardship 334
8.10  Implicit Contracts 335
  8.10.1  Definition and Empirical Evidence 335
  8.10.2  A Single-Period Non-Cooperative Game 336
  8.10.3  A Trust-Based Multi-Period Game 340
  8.10.4  Summary of Implicit Contracting 344
8.11  Summary of Efficient Contracting 344

9  An Analysis of Conflict 357
9.1  Overview 357
9.2  Agency Theory 358
  9.2.1  Introduction 358
  9.2.2  Agency Contracts Between Firm Owner and Manager 359
9.3  Manager’s Information Advantage 369
  9.3.1  Earnings Management 369
  9.3.2  The Revelation Principle 371
  9.3.3  Controlling Earnings Management 373
  9.3.4  Agency Theory with Psychological Norms 375
9.4  Discussion and Summary 378
9.5  Protecting Lenders from Manager Information Advantage 379
9.6  Implications of Agency Theory for Accounting 383
  9.6.1  Is Two Better Than One? 383
  9.6.2  Rigidity of Contracts 387
9.7  Reconciliation of Efficient Securities Market Theory with Economic Consequences 388
9.8  Conclusions on the Analysis of Conflict 389

10  Executive Compensation 403
10.1  Overview 403
10.2  Are Incentive Contracts Necessary? 404
10.3  A Managerial Compensation Plan 407
10.4  The Theory of Executive Compensation 409
  10.4.1  The Relative Proportions of Net Income and Share Price in Evaluating Manager Performance 409
  10.4.2  Short-Run Effort and Long-Run Effort 412
  10.4.3  The Role of Risk in Executive Compensation 415
10.5  Empirical Compensation Research 420
10.6  The Politics of Executive Compensation 422
10.7  The Power Theory of Executive Compensation 428
10.8  The Social Significance of Managerial Labour Markets that Work Well 431
10.9  Conclusions on Executive Compensation 432

11  Earnings Management 444
11.1  Overview 444
11.2  Patterns of Earnings Management 447
Preface

This book began as a series of lesson notes for a financial accounting theory course of the Certified General Accountants' Association of Canada (CGA). The lesson notes grew out of a conviction that we have learned a great deal about the role of financial accounting and reporting in our society from securities markets and information economics-based research conducted over many years, and that financial accounting theory comes into its own when we formally recognize the information asymmetries that pervade business relationships.

The challenge was to organize this large body of research into a unifying framework and to explain it in such a manner that professionally oriented students would both understand and accept it as relevant to the financial accounting environment and ultimately to their own professional careers.

This book seems to have achieved its goals. In addition to being part of the CGA program of professional studies for a number of years, it has been extensively used in financial accounting theory courses at the University of Waterloo, Queen's University, and numerous other universities, both at the senior undergraduate and professional master's levels. I am encouraged by the fact that, by and large, students comprehend the material and, indeed, are likely to object if the instructor follows it too closely in class. This frees up class time to expand coverage of areas of interest to individual instructors and/or to motivate particular topics by means of articles from the financial press and professional and academic literature.

Despite its theoretical orientation, the book does not ignore the institutional structure of financial accounting and standard setting. It features considerable coverage of financial accounting standards. Many important standards, such as fair value accounting, financial instruments, reserve recognition accounting, management discussion and analysis, employee stock options, impairment tests, hedge accounting, derecognition, and comprehensive income, are described and critically evaluated. The structure of standard-setting bodies is also described, and the role of structure in helping to engineer the consent necessary for a successful standard is evaluated. While the text discussion concentrates on relating standards to the theoretical framework of the book, the coverage provides students with exposure to the contents of the standards themselves.

I have also used this material in Ph.D. seminars. Here, I concentrate on the research articles that underlie the text discussion. Nevertheless, the students appreciate the framework of the book as a way of putting specific research papers into perspective. Indeed, the book proceeds in large part by selecting important research papers for description and commentary, and provides extensive references to other research papers underlying the text discussion. Assignment of the research papers themselves could be especially useful for instructors who wish to dig into methodological issues that, with some exceptions, are downplayed in the book itself.

This edition continues to orient the coverage of accounting standards to those of the International Accounting Standards Board (IASB). As in previous editions, some coverage of major U.S. accounting standards is also included.
I have retained the outline of the events leading up to the 2007–2008 securities market meltdowns, since these events have raised significant questions about the validity of many economic models, and continue to have significant accounting implications. Ramifications of these events are interwoven throughout the book. For example, one outcome of the meltdowns is severe criticisms of the efficient market hypothesis. Nevertheless, I continue to maintain that investors are, on average, rational and that securities markets, while not fully (semi-strong) efficient, are sufficiently close to efficiency (except during periods of bubble and subsequent liquidity pricing) that the implications of the theory continue to be relevant to financial reporting. Critical evaluation of these various criticisms and arguments is given. Nevertheless, I have moved from Chapter 3 to the Instructor’s Manual the lengthy outline of the diversified portfolio investment decision that was included in previous editions, replacing it with a much abbreviated discussion.

The Conceptual Framework retains its role as an important component of this book. As it is further developed, this framework will be an important aspect of the financial accounting environment. Its relationships to the theory developed here are critically evaluated. While extensive discussion of alternate theories of investor behaviour is retained, this book continues to regard the theory of rational investors as important to helping accountants prepare useful financial statement information.

The book continues to maintain that motivating responsible manager behaviour and improving the working of managerial labour markets is an equally important role for financial reporting in a markets-oriented economy as for enabling good investment decisions and improving the working of securities markets.

I have updated references and discussion of recent research articles, revised the exposition as a result of comments received and experience in teaching from earlier editions, and added new problem material. I also continue to suggest optional sections for those who do not wish to delve too deeply into certain topics.

Summary of Major Changes
Below is a comprehensive list of major changes made to the seventh edition of Financial Accounting Theory:

- Thorough review of recent academic accounting research, with updated explanations and discussion of important papers added throughout the text. The text represents the current state of academic accounting theory as published in major research journals up to about mid-2013.

- Increased attention to contract theory (replacing positive accounting theory), with Chapter 8 rewritten to fully explain the roles of reliability and conservatism of accounting information in securing efficient corporate governance, borrowing, and stewardship.

- Extensive discussion and evaluation of criticisms of securities market efficiency and investor rationality following the 2007–2008 securities market meltdowns. Much accounting research relies on these concepts. The important assumptions of rational expectations, common knowledge, and market liquidity that underlie market
efficiency theory are explained and discussed. The text concludes that relaxation of these assumptions is needed if accountants are to better understand the working of securities markets and the information needs of investors. The text also concludes that accounting-related securities anomalies, typically claimed to result from investor non-rationality, can also be consistent with investor rationality once these assumptions are relaxed. Theoretical and empirical papers supporting these conclusions are outlined (Chapters 4 and 6).

- New and proposed accounting standards, including for financial instruments, derecognition, consolidation, leases, and loan loss provisioning, are described and evaluated. Discussion of the Conceptual Framework is updated throughout the book.

- Discussion of standards convergence and the possibility of U.S. adoption of International Accounting Standards is updated to take recent developments into account (Chapter 13).

- Recent research using sophisticated computer software to evaluate the information content of the written and spoken word is explained and evaluated. The text includes coverage of research papers using this methodology to study the informativeness of Management Discussion and Analysis (Chapter 3) and of executive conference calls (Chapter 11).

- New problem material is added throughout the text, including numerical problems of present value accounting, decision theory, and agency. Other new problems are based on embedded value, earnout contracts, outside directors, bail-in bonds, delegated monitoring, ESO repricing, and Sarbanes-Oxley Act. Discussions and problem materials derived from recent accounting scandals (Groupon, Olympus Corp., and Satyam Computer Services) are also added.

- Discussion of whether information risk is diversifiable, and thus of the extent to which firms benefit from superior accounting disclosure, is updated in the light of recent research (Chapter 12).

- The lengthy explanation of portfolio theory, included in all previous editions, is moved to the Instructor’s Manual, replaced by a much shorter explanation of portfolio diversification (Chapter 3).

- Discussion and illustration of Management Discussion and Analysis (Chapter 3) and of Reserve Recognition Accounting (Chapter 2) are updated.

**SUPPLEMENTS**

**Instructor’s Solutions Manual**

The Instructor’s Solutions Manual includes suggested solutions to all the end-of-chapter Questions and Problems. It also offers learning objectives for each chapter and suggests teaching approaches that could be used. In addition, it comments on other issues for consideration, suggests supplementary references, and contains some additional problem
material taken from previous text editions. The Instructor's Manual is available in print format and also available for downloading from a password-protected section of Pearson Education Canada's online catalogue (www.pearsoned.ca/highered). Navigate to your book's catalogue page to view a list of supplements that are available. See your local sales representative for details and access.

- **PowerPoint® Lecture Slides**  PowerPoint presentations offer a comprehensive selection of slides covering theories and examples presented in the text. They are designed to organize the delivery of content to students and stimulate classroom discussion. The PowerPoint® Lecture Slides are available for downloading from a password-protected section of Pearson Education Canada's online catalogue (www.pearsoned.ca/highered). Navigate to your book's catalogue page to view a list of supplements that are available. See your local sales representative for details and access.

- **CourseSmart for Instructors**  CourseSmart goes beyond traditional expectations, providing instant online access to the textbooks and course materials you need at a lower cost for students. And even as students save money, you can save time and hassle with a digital eTextbook that allows you to search for the most relevant content at the very moment you need it. Whether it's evaluating textbooks or creating lecture notes to help students with difficult concepts, CourseSmart can make life a little easier. See how when you visit www.coursesmart.com/instructors.

- **CourseSmart for Students**  CourseSmart goes beyond traditional expectations, providing instant, online access to the textbooks and course materials you need at an average savings of 50%. With instant access from any computer and the ability to search your text, you'll find the content you need quickly, no matter where you are. And with online tools like highlighting and note-taking, you can save time and study efficiently. See all the benefits at www.coursesmart.com/students.

- **Pearson Custom Library**  Create your own textbook by choosing the chapters that best suit your own course needs, increases value for students, and fits your course perfectly. With a minimum enrolment of 25 students, you can begin building your custom text. Visit www.pearsoncustomlibrary.com to get started.
Acknowledgments

I have received a lot of assistance in writing this book. I thank CGA Canada for its encouragement and support over the past years. I acknowledge the financial assistance of the Ontario Chartered Accountants’ Chair in Accounting at the University of Waterloo, which enabled teaching relief and other support in the preparation of the original manuscript. Financial support of the School of Business of Queen’s University is also gratefully acknowledged.

I extend my thanks and appreciation to the following instructors, who provided formal reviews for this seventh edition:

Hilary Becker, Ph.D., CGA
Carleton University
Sprott School of Business

Carla Carnaghan
University of Lethbridge
Faculty of Management

Roger Collins
Thompson Rivers University
School of Business and Economics

Charles Draimin
Concordia University
John Molson School of Business

Wenxia Ge
University of Manitoba
Asper School of Business

Luo He
Concordia University
John Molson School of Business

Camillo Lento
Lakehead University
Faculty of Business Administration

I also thank numerous colleagues and students for advice and feedback. These include Sati Bandyopadhyay, Jean-Étienne De Bettignies, Phelim Boyle, Dennis Chung, Len Eckel, Haim Falk, Steve Fortin, Irene Gordon, Jennifer Kao, James A. Largay, David Manry, Patricia O’Brien, Bill Richardson, Gordon Richardson, Dean Smith, Dan Thornton, and Mike Welker. Special thanks to Alex Milburn for invaluable assistance in understanding IASB standards, and to Dick VanOfferen for helpful comments and support on all editions of this work.
I thank the large number of researchers whose work underlies this book. As previously mentioned, numerous research papers are described and referenced. However, there are many other worthy papers that I have not referenced. This implies no disrespect or lack of appreciation for the contributions of these authors to financial accounting theory. Rather, it has been simply impossible to include them all, both for reasons of space and the boundaries of my own knowledge.

I am grateful to Carolyn Holden for skilful, timely, and cheerful typing of the original manuscript in the face of numerous revisions, and to Jill Nucci for research assistance.

At Pearson Canada I would like to thank Nicole Lukach, Gary Bennett, Vice-President, Editorial Director; Claudine O’Donnell, Managing Editor, Business Publishing; Megan Farrell, Acquisitions Editor; Kathleen McGill, Sponsoring Editor; Rebecca Ryoji, Developmental Editor; Jessica Hellen, Project Manager; Marg Bukta, Copyeditor; Raghavi Khullar, Production Editor; and Claire Varley, Marketing Manager.

Finally, I thank my wife and family, who, in many ways, have been involved in the learning process leading to this book.

William Scott
