Namir's Marvellous Masterpieces

Name: _____

Investigate Growing and Shrinking Patterns (Further Developed)	Not observed	Sometimes	Consistently
Creates increasing/decreasing patterns			
Describes increasing/decreasing pattern			
Extends number patterns			
Finds missing elements in number patterns			
Use Equations to Represent Growing and Shrinking Patterns			
Generalizes and explains the rule for arithmetic patterns (including the starting point and change)			
Writes one-step addition and subtraction equations to match a pattern rule

NOTE TO THE TEACHER

You may wish to send families a **Namir's Marvellous Masterpieces** letter outlining a familiar activity or two they can do at home with their children.

Create a letter using this template and select one or two activities from the suggestions on the next page. Simply **delete these instructions and cut and paste the activities you have selected**, adapting them to fit your needs.

Connecting Home and School Line Master 2–2

Dear Family:

We have been working on **Namir's Marvellous Masterpieces**, which engages children in conversations, investigations, and activities that help to develop their understanding of the big math idea that "Patterns can be described mathematically." Particular focus is placed on describing, extending, and creating growing and shrinking patterns, and on using equations to represent growing and shrinking patterns. Try this activity at home with your child.

✂ –
Reading the Story: As you read the story, explore the patterns with your child and invite him/her to predict the next terms. After you read, you might gather some small objects, such as different coloured beans or buttons, and use the Math Mat (inside back cover of the book) to help you and your child create repeating, growing, and shrinking patterns.

✂ –
Pattern Walk: Take a walk outside with a pencil and notepad, and record all the patterns you see. You could also look for patterns inside. Challenge your child to see who can find more patterns. Play again, but this time, look only for growing or shrinking patterns.

✂ –
Money Patterns: Invite your child to use nickels and dimes to create growing and shrinking money patterns. For the first round, use only dimes or only nickels, so that the total goes up (or down) by only 10 or 5. Then, encourage your child to use both coins to create patterns. You can try to guess the pattern rule or keep extending the pattern. Repeat, but this time you create the pattern and have your child give the pattern rule or extend it.

✂ –

Toothpick Designs: Create a growing or shrinking pattern with your child using toothpicks. When the pattern is finished, ask your child to state the pattern rule. For an additional challenge, create a pattern without showing it to your child and then remove part of it (a middle section). Challenge your child to fill in the missing part.

✂ –
Sincerely,

_____

in the store.

Pattern Problems

✂ -
Namir is biking to his family's store, which is 5 blocks away. If it takes him 2 minutes to bike 1 block, how long will it take him to get to the store?

Number of Blocks	Number of Minutes
1	2

✂ -
Naia saves 4 quarters each day she works at the store. If she works 6 days, how many quarters will she have saved?

Number of Days	Number of Quarters Saved
1	4

✂ -

Pattern Problems

✂ -
Naia gives her brother these numbers: 150, 125, 100, 75.

What is the pattern rule?

What are the next 2 terms of this pattern?

✂ -
A delivery truck brought 5 loaves of bread to the family store on Monday, 16 loaves of bread on Tuesday, and 27 loaves of bread on Wednesday. If this pattern continues, how many loaves of bread will be delivered on Thursday and Friday?

✂ -
Namir sold 7 sandwiches on Thursday, 14 sandwiches on Friday, and 21 sandwiches on Saturday. If this pattern continues, how many sandwiches will Namir sell on Sunday and Monday?

✂ -
Naia sold 15 boxes of dog treats during the first week of the month. She sold 25 boxes the next week and 35 the following week. If this pattern continues, how many boxes of dog treats will she sell in the next 2 weeks?

✂ -

Pattern Problems

✂ —
In the early winter, Namir's family sells gingerbread cookies. The first week, they sell 10 cookies. The next week, the sales double. The third week, the sales double again. How many cookies do they sell during the second and third weeks?

✂ —

Naia made this pattern out of cereal boxes at the store. What would be the next 2 terms of this pattern?

✂ —
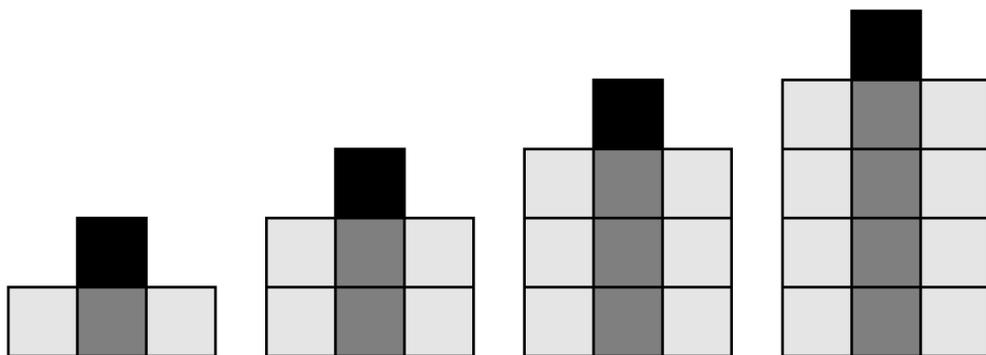

Naia decides to make another pattern. It looks like this:
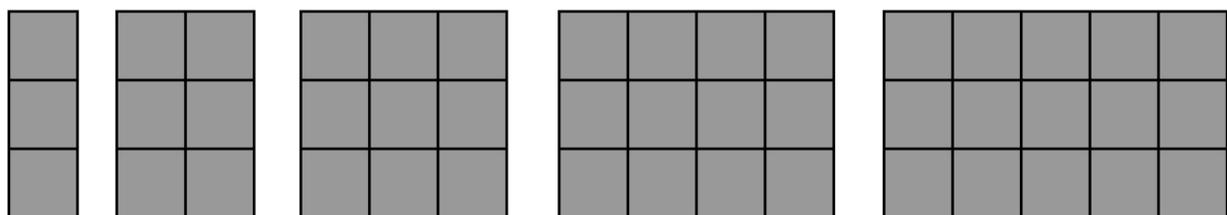

What would be the next 3 terms of this pattern?

✂ —
